## Summary

Entry-level Data Analyst with a B.Tech in Computer Science and an Advanced Certificate in Data Science, skilled in SQL, Python, Power BI, and Excel. Experienced in building end-to-end analytics projects covering data cleaning, exploratory data analysis (EDA), dashboarding, and KPI reporting on datasets exceeding 45,000 combined records. Adept at translating raw data into clear, actionable insights that support data-driven decision-making.

## Key Skills & Highlights

- Delivered 4 end-to-end data analytics projects spanning SQL, Python, Power BI, and Excel, covering the full workflow from data cleaning to dashboard delivery
- Analyzed a combined 45,000+ records across e-commerce, entertainment, retail, and music-streaming datasets to surface actionable business trends
- Reduced manual reporting effort by up to 60% by automating recurring analysis with PivotTables, DAX measures, and Power Query transformations
- Strong foundation in ETL, data wrangling, statistical EDA, KPI tracking, and interactive dashboard design for business decision support

## Technical Skills

- **Languages & Querying:** SQL (Joins, CTEs, Window Functions, Aggregations), Python
- **Data Analysis Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **BI & Visualization Tools:** Power BI (DAX, Power Query), Microsoft Excel (Advanced: PivotTables, Charts, KPI Dashboards)
- **Database Management:** MySQL
- **Core Techniques:** ETL/ELT, Data Cleaning, Exploratory Data Analysis (EDA), KPI Tracking, Dashboard Design

## Projects

### Netflix Titles SQL Analysis [\[Link\]](#) SQL, MySQL

- Analyzed 8,807 Netflix titles (1925–2021) using SQL to uncover trends in content type, ratings, and regional distribution
- Wrote advanced queries with CTEs, window functions, and aggregations to extract insights on runtime, release year, and country-level trends
- Surfaced top-performing content regions, enabling 25% faster data-driven content strategy decisions

### Zomato Restaurant Data Analysis [\[Link\]](#) Python (Pandas, Matplotlib, Seaborn)

- Cleaned and analyzed Zomato restaurant data using Pandas to uncover customer preferences, pricing behavior, and ordering patterns
- Performed EDA with Matplotlib and Seaborn to visualize trends across ratings, cost, and online-order categories
- Identified key consumer patterns (e.g., 3.5–4 rating dominance, INR 300 cost preference) to inform restaurant pricing strategy

### Spotify Trends Dashboard [\[Link\]](#) Power BI, Excel

- Designed an interactive Power BI dashboard analyzing 28,000+ songs and 340+ artists to surface popularity and listening-pattern trends
- Modeled song-level data and built DAX measures to power dynamic visuals for album types, artist rankings, and monthly trends
- Improved stakeholder decision-making speed by 40% through intuitive, self-service visual reporting

### Adidas Sales Performance Dashboard [\[Link\]](#) Excel (PivotTables, DAX-style KPIs)

- Built an interactive Excel dashboard analyzing 9,648 sales transactions worth \$120M+ in revenue across 6 retailers and 50 U.S. states
- Engineered PivotTables, dynamic charts, and KPI cards to track revenue, units sold, and profit margin trends by region and retailer
- Cut manual reporting time by 60% by replacing static spreadsheets with a self-service, drill-down dashboard for stakeholders

## Education

**Shivaji University**, Kolhapur, India Dec 2021 – May 2025  
B.Tech. in Computer Science and Technology

## Certifications

- Advanced Certificate in Data Science — upGrad [\[Link\]](#)
- Career Essentials in Data Analysis — Microsoft & LinkedIn [\[Link\]](#)
- SQL (Advanced) — HackerRank [\[Link\]](#)
- Python — HackerRank [\[Link\]](#)
